Attention: Always test LineLED operation before installing. Connect LineLED to power supply to ensure it is working properly and no damage has occurred during shipping.

1 Clean the area thoroughly where the LineLED will be installed.

Remove the paper backing from the LineLED and firmly press down making sure there are no air bubbles that can cause surface irregularities. **Do not remove the adhesive, removing the adhesive may cause arcing of the Line LED tape.**

LineLED

adhesive paper backing

ripple

Soldered joints

NOTE - When removing backing & laying LineLED to surface avoid installing with ripples & bending over 90°.

NOTE - Avoid bending near 1" on both side of the soldered joints.

2 If length of LineLED needs to be adjusted on site, simply cut the LED strip in between solder pads. Always cut from end with no connector/wire leads.

RECOMMENDED LAYOUT FOR MULTIPLE ADJACENT RUNS OF LINELED FED WITH SEPARATE POWER SUPPLIES

Position power supplies either in the middle of two runs or at the opposite ends.

4

Always ensure power to power supply is off! Follow diagrams to connect power feed wires to power supply. Refer to power supply instructions for wiring line voltage side.
