NOTE: Prior to installation all 24VDC wires must be present within 72" of the installation. Refer to the power supply installation instruction for additional information.

NOTE: More than one person is recommended for this installation.

1.1 Once the location or pattern is determined for Plexineon to be installed, start off by marking the area. Amount of mounting clips may vary dependant upon pattern. Reference diagrams below.

Straight run with mounting clips

A.1 Line up and screw on the mounting clips to the mounting holes with no greater than 30" apart. Make sure it is straight by using a level.

A.2 Fix the plexineon fixture into installed mounting clips. See page 3 for clipping instructions.

Curved run/rings with mounting clips

B.1 Determine the shape of the plexineon layout, then mark the pattern onto the surface. Place the mounting clips with no greater than 30" apart. Screw onto surface.

B.2 Fix the plexineon bend/ring fixture into installed mounting clips. See page 3 for clipping instructions.

NOTE: Standard Clips and Decorative Clips have different required spacing.

← standard mounting clip
30" space

← decorative mounting clip
18" space

WIRING DIAGRAM

SR-DMX-SPI

Smart Pixel LineLED Decoder

NOTE: Please make sure that power is turned off before wiring.

Also, ensure that the correct power supply (voltage and wattage) is used to power the LED strips connected to the decoder. Follow illustrated wiring diagram. Use screwdriver to open and close connection slots.

NOTE: When connecting two or more LED strip lights or light fixtures, always make sure the signal direction arrows are pointing to same direction

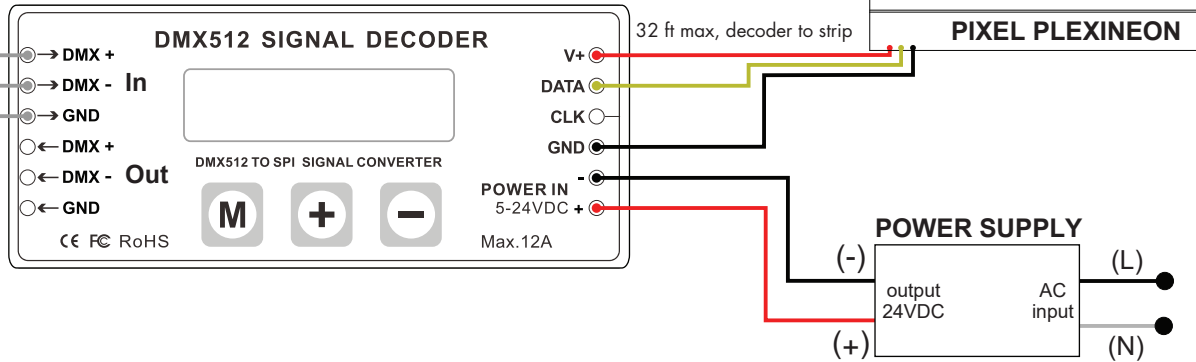

The signal direction arrow should appear on label of each section of LED fixture.

NOTE: Must power from the opposite direction of the signal direction arrow

OPERATING GUIDE

SR-DMX-SPI

Smart Pixel LineLED Decoder

There are three buttons on the decoder.

Parameter Setting

Increase Value

Decrease Value

After operation, if no action was taken within 30s, the button lock, and backlight of the screen will turn off.

1. Long press M button for 5s to unlock the buttons, and the backlight will turn on.
2. Long press M button for 5s to switch between test mode and decode mode after unlocked. During test mode, the first line of LCD will show: TEST MODE. Use test mode to verify RGBW Pixel functionality. During decoder mode, the first line of LCD shows: DECODER MODE. Use decoder mode when connecting to a Controller and for final installation and customization.

The second line of the LCD Display shows the current setting and value. Note: 1 Pixel = 1 Cut Increment

MODE TABLE
