1

Note: The Kendo 45-S can be installed with or without mounting brackets. See steps 2 and 3 for each variation. Refer to dimensions above for preparing the area where the fixture will be mounted.

2 Mounting without brackets

Use the body of the fixture to mark mounting position on the surface and then apply construction adhesive along markings. Follow the recommendations of adhesive manufacturer for application and drying time. Then affix the Kendo 45-S while applying pressure.

If mounting fixture recessed into a surface, first prepare recessed area by referring to fixture dimensions from step 1. When mounting area is clean, follow this same adhering procedure.

3a Mounting with brackets

Use mounting brackets to mark location of holes on mounting surface. Ensure that the mounting holes are perfectly aligned so that the brackets will be mounted in a straight line. Then attach brackets with flathead screws.

3b Mounting with brackets

Once brackets have been properly installed (step 3a) simply snap on the Kendo 45-S fixture.

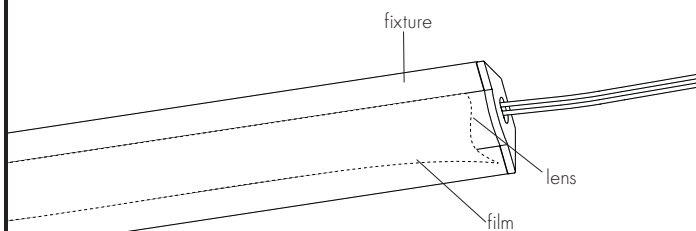

4

Ensure power is off to power supply!
Then proceed to connect Kendo 45-S to power supply.
Connection can be established with lead wires or quick-connect powerfeed.

For more information please refer to power supply wiring instructions and Kendo 45-S specification sheet.

5 Remove the protective film from the lens.
