

mCAL Channel - Installation Instructions

Please read all instructions prior to installation and keep for future reference!

- | | |
|--|--|
| 1. PRODUCT TO BE INSTALLED BY A QUALIFIED ELECTRICIAN. | 5. WALL MOUNT ONLY |
| 2. USE ONLY WITH CLASS 2 POWER UNIT | 6. SUITABLE FOR INSTALLATION WITHIN THE CLOSET STORAGE SPACE |
| 3. 24 VOLTS DC | 7. INHERENTLY PROTECTED |
| 4. SUITABLE FOR DAMP LOCATIONS | |

1

1.1 If necessary cut the extrusion, reflector & cover to the desired length, with the proper equipment/tool that is appropriate to cut aluminum.

2

2.1 LineLED can be shortened by cutting along the dashed lines in between the solder pads. Make sure the cut is made on the side of the LineLED without the wire leads. LineLED cannot touch the metal endcap which will shorten the circuit.

3

3.1 Prior to installing the fixture, 3 sets of holes need to be made into the extrusion. Refer to drawing above to make all necessary holes to the extrusion. For installation to work properly.

- Drill two 5/32" hole, 4" from each end of the extrusion and at least 2 more for the mounting the extrusion properly.
- Drill two 3/32" holes, 1/8" away from each end of the fixtures. For the endcaps to secure properly.
- If necessary drill a 1/2" hole on the extrusion to connect a conduit connector

4

4.1 Holes will also have to be made to the reflector, Refer to drawing above to make all necessary holes to the reflector.

- Drill two 9/64" hole, 1/2" from each end of the extrusion, to secure reflector to extrusion.
- Drill a 11/64" hole, 1/4" from one end of the reflector for the LineLED wires to connect to the power feed wire.
