Senso Mini Accent Lights

Place

Rain

Set

Senso Mini Accent lights are tiny, but they pack a punch. They come in 3 styles: Place, Rain, and Set.

Place is adjustable up to 20° on each side and can be used as a spotlight for art or angled to create a wall-washing effect. Place measures 2.0" in diameter, 0.7" aperture, and is available in brushed aluminum or black.

Rain is wet-rated and works in environments with indirect exposure to water like bathrooms and covered patios. Rain measures 2.5" in diameter, 1.2" aperture, and is available in brushed aluminum.

Set is a fixed downlight for general & task lighting, shelving, or niches. Set measures 1.65" in diameter, 0.7" aperture, and is available in brushed aluminum or black.

Mini Accent lights are the best way to add visual pop to any space without intruding into your design. All three versions are recessed, install with a single step, and mount flush on the surface. Up to 17 fixtures can be driven off of one driver and each consumes only 1.3W.

Shared Features:

- 90CRI
- 2700K / 3000K / 4000K
- 90 lumen/W
