Niles, IL 60714 T 224.333.6033 F 224.757.7557 info@luminii.com www.luminii.com

Using the App

3.1 Select "Create New Preset" button.

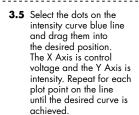

3.2 Change the preset name and description to your own.

3.3 Set the CCT values of your light source or choose from preset Fixture CCTs option

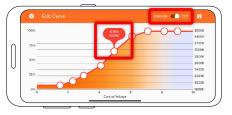

3.4 Tap into the dim curve editing window.

Use the toggle in the upper right corer to switch to the CCT curve. Drag each plot point on the red line to the desired positions. This time the Y axis indicates

Once the desired curves are set, tap the Save button in the upper right corner again to save the preset.

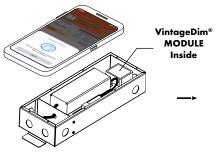

3.6 Select your new user preset from the main list.

3.7 Press Program button.

3.8 Place phone directly on the VintageDim® module. Phone will play a tone when programming begins. Programming is complete when you hear a single beep and see the "Programming Successful" screen.

If the driver was off during programming, simply power on and the driver will work according to the new program. If the driver was on during programming, it will need to be power cycled for new programming to become active.

* Lid of driver case must be removed.
